Crumbles· Gingerbread House

Front gable wall

Overall: 140 mm wide · 125 mm wall · 65 mm gable

Red line: cut piece | Blue dashed: optional opening

Attach door; do not cut an opening. Make door separately: 30 × 58 mm.

Windows: 25 × 28 mm each; gable window: Ø 18 mm.

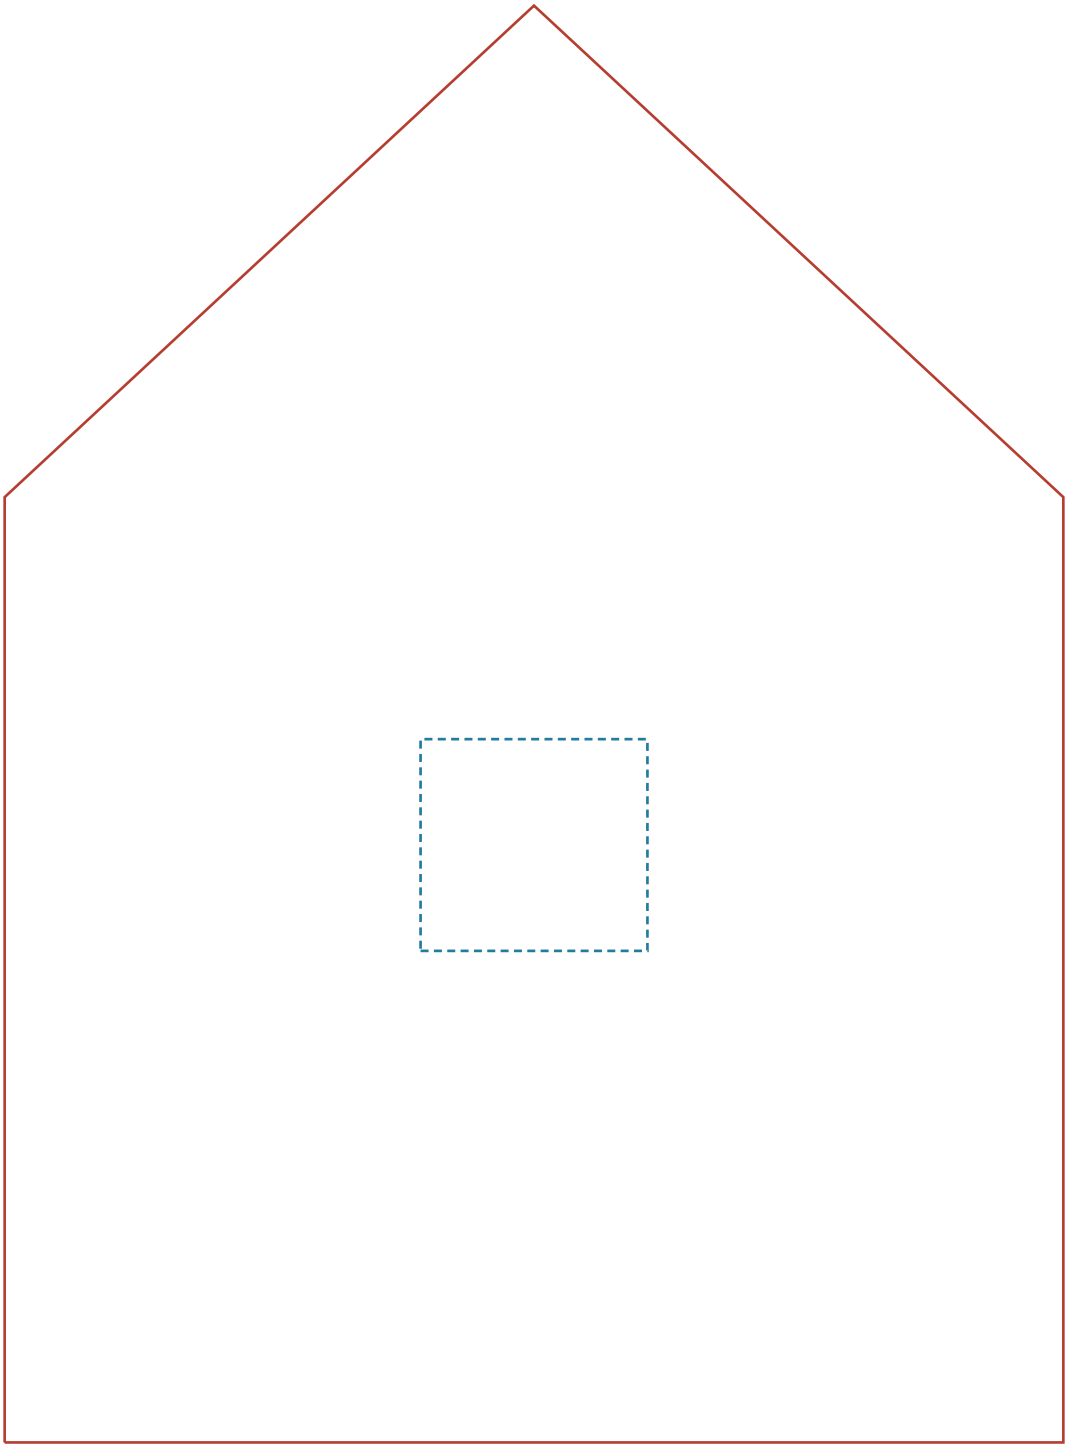

Check line: 50 mm

· A4 · print at 100% / actual size

Rear gable wall

Overall: 140 mm wide · 125 mm wall · 65 mm gable

Red line: cut piece | Blue dashed: optional opening

Optional rear window: 30 × 28 mm.

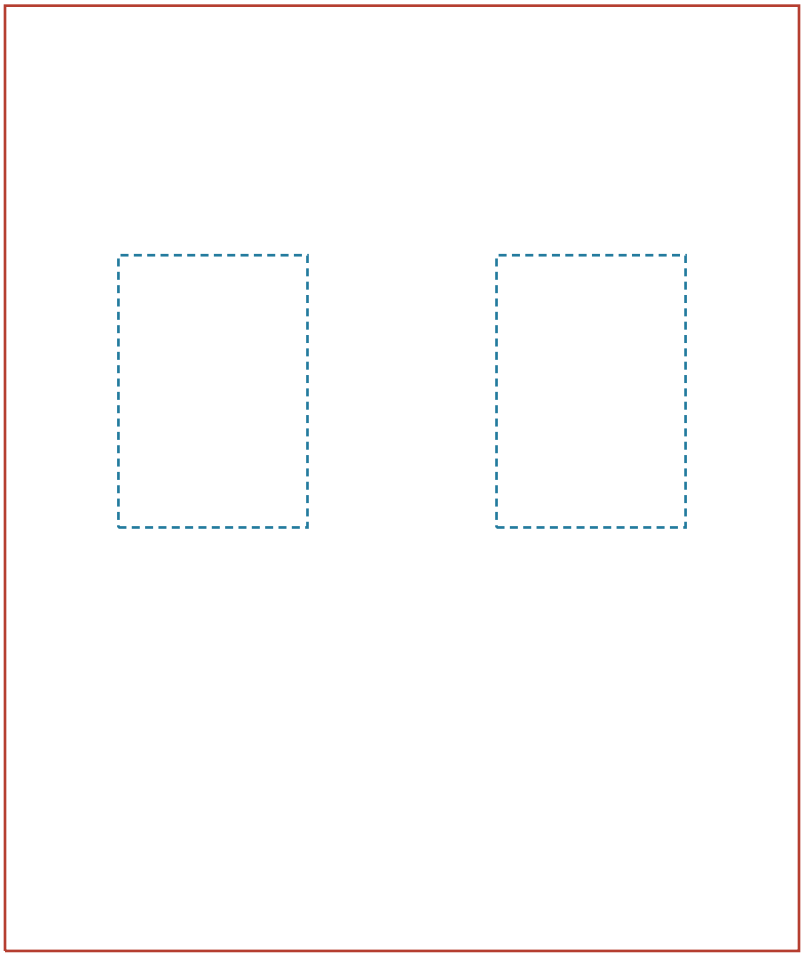

Check line: 50 mm

· A4 · print at 100% / actual size

Left side wall

Overall: 105 × 125 mm · two windows as shown

Red line: cut piece | Blue dashed: optional opening

Two optional window openings: 25 × 36 mm each.

Pipe icing crosses on the candy windows to make four panes.

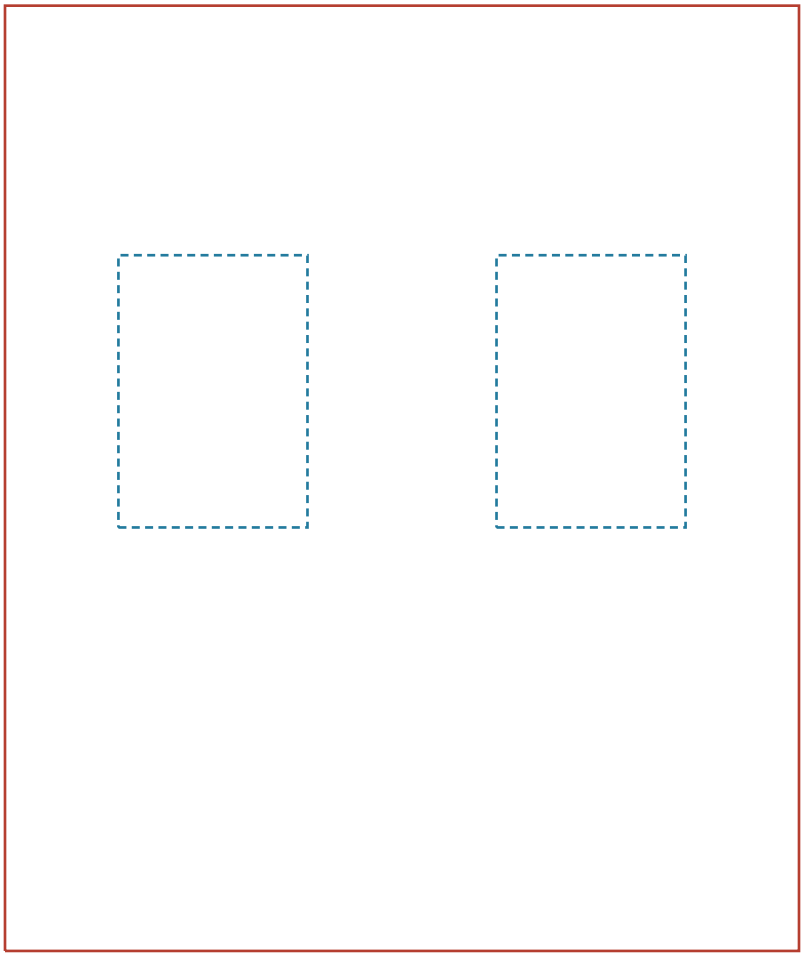

Check line: 50 mm

· A4 · print at 100% / actual size

Right side wall

Overall: 105 × 125 mm · two windows as shown

Red line: cut piece | Blue dashed: optional opening

Two optional window openings: 25 × 36 mm each.

Pipe icing crosses on the candy windows to make four panes.

Check line: 50 mm

· A4 · print at 100% / actual size

Left roof panel

125 × 110 mm · one of two roof panels

Red line: cut piece | Blue dashed: optional opening

Cut the roof panel along the red line.

Check line: 50 mm

· A4 · print at 100% / actual size

Right roof panel

125 × 110 mm · one of two roof panels

Red line: cut piece | Blue dashed: optional opening

Cut the roof panel along the red line.

Check line: 50 mm

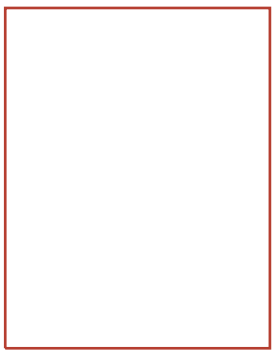

· A4 · print at 100% / actual size

Chimney · fitted pieces

Optional · 35 mm wide · 25 mm deep

Red line: cut piece | Blue dashed: optional opening

Lower edges are pre-angled to fit the roof before baking.

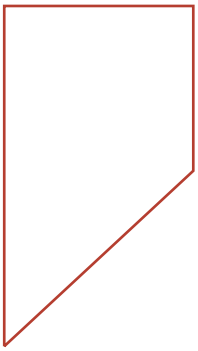

Eave side

35 × 45 mm

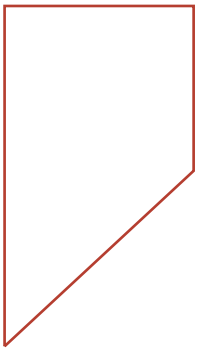

Ridge side

35 × 21,8 mm

Side

Side

IMPORTANT: Cut all pieces using this template before baking.

The angled lower edges of the side pieces rest on the roof.

Test the paper pieces against the roof panel before cutting dough.

Assemble the chimney only after baking and cooling.

Check line: 50 mm

Crumbles’ Gingerbread House

Part 1 · Preparation and templates

1. Check the templates

Print the seven template pages on A4 paper at 100% / actual size. Measure the 50 mm check line with a ruler. Do not use “fit to page”.

2. Prepare a sturdy base

Use a sturdy, food-safe cake board or suitable serving board measuring at least 24 × 21 cm. No gingerbread base slab is needed.

3. Cut the window openings

Cut the blue dashed openings from the paper templates and then from the unbaked dough: two front windows, one round gable window and two windows in each side wall. Do not cut thin dough strips for window muntins.

4. Make the door separately

Cut a separate 30 × 58 mm gingerbread door. Keep the front wall solid where the door will go. Attach the door later and decorate it with an icing arch.

5. Fit the chimney before baking

For the optional chimney, use the four shapes on page 7. The angled bottom edges are already included. Test the paper pieces against the chosen roof position. Make any adjustments before cutting the dough and before baking.

Crumbles’ Gingerbread House

Part 2 · Baking and assembly

6. Bake the pieces

Roll the dough to about 5 mm thick according to the recipe. Cut the walls, two roof panels, door and, if desired, four already-adjusted chimney pieces. Bake as directed and cool completely.

7. Assemble the chimney

Join the four baked pieces with thick royal icing to make an open-topped chimney. Support it and let it set. Attach it to the roof only afterward.

8. Stand up the walls

Place the two gable walls (140 mm wide) opposite each other on the board. Position the two side walls (105 mm long) between them. Join with thick icing, support and let set.

9. Attach the two roof panels

Use exactly two roof panels, each 125 × 110 mm. The 125 mm edge runs along the length of the house. Centered, they overhang the front and back by about 10 mm. Join at the ridge, support and let set.

10. Attach the chimney

Secure the hardened chimney at the pre-checked spot on one roof slope using thick icing. Support it until firm.

Crumbles’ Gingerbread House

Part 3 · Windows, lighting and decoration

11. Make translucent candy windows

Clear yellow or amber hard candies can be used as edible windowpanes. Only adults should melt them on a suitable heat-resistant surface and allow the thin panes to cool completely. Attach behind the openings. Caution: hot sugar can cause severe burns.

12. Decorate windows and door

Pipe an icing cross onto each rectangular candy window to create four panes. Decorate the attached door with a rounded icing arch and sweets.

13. Light the house with an LED

Position a small battery-operated LED tea light so it remains accessible and removable for switching off and changing batteries, for example through an accessible opening. Never use a real flame. Keep batteries, especially button cells, away from children.

14. Add removable cotton smoke

A small tuft of cotton can decorate the chimney. Cotton is not edible, must not touch food and must be removed completely before eating.
